

PROFESSIONAL PROFILE

Jeevithkumar R

Full Stack Developer · AI-Integrated Web Systems · Infrastructure & DevOps

Thirupattur, Tamil Nadu 635901 · +91 91599 77179 · jeeviaero123@gmail.com

WHO I AM

I am a full stack developer who owns projects end-to-end — from the first requirement-gathering call to the running production server. With **4+ years of experience** and **50+ live websites** shipped across static, dynamic, WordPress, and custom-built platforms, I build, deploy, secure, and monitor the products I create. I currently **lead a five-person development team** and personally manage the infrastructure and delivery of **six live production client properties**.

What sets me apart is the combination of an engineering mindset and hands-on ops ownership. My background in **Aeronautical Engineering and Quality Assurance** gives me a process-driven, root-cause debugging discipline — I diagnose problems at their source instead of patching symptoms. On top of that, I am actively building **AI-assisted development capability**: RAG chatbots, LLM integrations, and AI agent tooling that make teams faster and systems smarter.

LIVE CLIENT PROPERTIES

WHAT I DELIVER

- **End-to-end web development** — custom, database-driven sites with Core PHP, MySQL, and React/Next.js front ends, built mobile-first and cross-browser compatible.
- **Full infrastructure ownership** — server provisioning and hardening (Apache, Nginx, PHP-FPM, cPanel/WHM, Google Cloud), SSL/DNS, reverse proxies, and performance layers (Redis, OPcache, LiteSpeed Cache).

- **AI & automation** — RAG pipelines, vector search (ChromaDB), OpenAI/Claude/Gemini integrations, AI agents, MCP, and local LLM deployment with Ollama.
- **CRM & API integration** — Microsoft Dynamics 365, Power Apps, Exelare ATS, custom career-form APIs with full server-side validation, and webhook-driven workflows.
- **SEO, analytics & monitoring** — Core Web Vitals, structured data, GoAccess real-time dashboards with automated Excel/Word reporting, and Prometheus-based system monitoring.
- **Reliability & security** — SSL/HTTPS enforcement, Cloudflare, Wordfence, anti-spam systems, OWASP fundamentals, and proven malware cleanup and post-incident recovery.
