

PROFESSIONAL SUMMARY

Full stack developer with 4+ years of experience and 50+ live websites delivered across static, dynamic, WordPress, and custom-built platforms. Owns projects end-to-end — requirement gathering, frontend and backend development, server provisioning and deployment, CRM/API integration, analytics, and SEO. Currently leads a five-person development team and manages a live portfolio of six production client properties. Actively building AI-assisted development capability — RAG chatbots, LLM integrations, and AI agent tooling — alongside deep, hands-on infrastructure and DevOps ownership. Background in Aeronautical Engineering and Quality Assurance brings a process-driven, root-cause debugging discipline to every project.

CORE TECHNICAL SKILL SET

I. Frontend Development

HTML5, CSS3, JavaScript (ES6+), TypeScript; SCSS/SASS, Tailwind CSS, Bootstrap, Flexbox, CSS Grid, responsive & mobile-first design, clamp()-based fluid layouts; React.js, Next.js, Vite, component architecture, SSR/SSG; DOM manipulation, Fetch API, Axios, GSAP, SVG/Lottie/CSS animation, scroll animation, micro-interactions; TOC scroll-spy, voice reader / share toolbar, Flatpickr widgets.

II. Backend Development

Core PHP (advanced), Node.js, Express.js, Python, FastAPI, Django (basic); CodeIgniter, Laravel (familiar); REST & CRUD API design, JWT/OAuth concepts, third-party API integration, file upload APIs.

III. AI, LLM & Agent Systems

RAG pipelines, vector similarity search, confidence-threshold tuning; AI agents, MCP, LangChain, Llamaindex, Ollama & local LLM deployment; embedding models, ChromaDB and vector databases; OpenAI, Claude, Gemini API integration, prompt engineering; AI-assisted development workflows.

IV. CMS & eCommerce (WordPress)

Custom theme & plugin development, Elementor Pro, WPBakery, Gutenberg, Astra; Crocoblock/JetEngine — Query Builder, Listing Grid, Dynamic Content/Templates/Visibility, CPTs, taxonomies; WooCommerce, Contact Form 7 (async email, honeypots, anti-spam), WPForms, Fluent Forms; WPCode, child themes, hooks, shortcodes.

V. Database

MySQL/MariaDB — schema design, complex queries, performance tuning; SQLite; ChromaDB vector store; backup, restore, import/export, query optimization.

VI. CRM & Third-Party Integrations

Microsoft Dynamics 365 (Dataverse, FormCapture.bundle.js, d365mktformcapture), Power Apps; Exelare ATS integration, Spiceworks help desk; career-form APIs with full server-side validation, webhooks, payment gateway concepts.

VII. Infrastructure, Server Admin & DevOps

Linux (Ubuntu, Rocky Linux), SSH, cPanel/WHM, Apache, Nginx, PHP-FPM; SSL/TLS with automated Let's Encrypt renewal, DNS, reverse proxy; Google Cloud Platform hosting & server management; Redis, OPcache, LiteSpeed Cache; PM2, cron automation, Git & GitHub, Docker/Docker Compose, Kubernetes (basic), CI/CD concepts.

VIII. Security

SSL/HTTPS enforcement, Cloudflare (incl. Turnstile), Wordfence, reCAPTCHA; IP rate limiting, MX validation, disposable-email blocking, honeypot fields; input validation, secure headers, OWASP fundamentals, malware cleanup and post-incident recovery.

IX. SEO & Performance

robots.txt, XML sitemaps, canonical URLs, structured data/schema markup, crawl & indexing optimization; Rank Math, Yoast SEO, Google Search Console, Google Analytics; Core Web Vitals, Lighthouse/PageSpeed audits, TTFB optimization, lazy loading, image optimization (WebP, Smush, Asset CleanUp), critical CSS, gzip/Brotli, CDN strategy.

X. Analytics & Monitoring

GoAccess — real-time dashboards, automated daily/monthly reports with Excel & Word export, GeoIP tracking, automated email delivery; Prometheus and node exporter, centralized log analysis (Apache/Nginx/PHP/system), uptime & error monitoring, root-cause analysis.

XI. Email & Deliverability

SMTP configuration (Brevo, WP Mail SMTP), SPF/DKIM verification; Zoho Mail and G Suite administration, deliverability troubleshooting (e.g., Exchange SendAsDenied, sender-identity issues).

XII. Design & UX

UI/UX design, wireframing, visual hierarchy, typography, color theory, spacing & design systems; SaaS/enterprise UI, dashboard design, glassmorphism/neumorphism, landing pages & hero sections; Figma, Canva, Adobe Photoshop, Illustrator.

XIII. Tools & AI-Assisted Workflow

VS Code, GitHub Desktop, Postman, Chrome DevTools, FileZilla, Cloudinary; AI coding assistants — ChatGPT, Claude, Gemini, GitHub Copilot, Cursor AI, Windsurf AI.

XIV. Leadership & Process

Team lead for five-person development team; primary client-facing technical contact; concurrent management of six production properties; root-cause debugging methodology; technical documentation and professional writing.

CURRENT LIVE PROJECTS

Production properties — development, maintenance & infrastructure

Project	URL
Tryvium	https://www.tryvium.ai/
Eprotech	https://www.eprotech.ai/

Sensiple	https://www.sensiple.com/
Phifix	https://www.phifix.com/
Cloudsens	https://www.cloudsens.ai/
Quinovate	https://www.quinovate.ai/

Notable initiative: architecting a Next.js/Turborepo monorepo migration strategy for Tryvium's B2B SaaS platform — stack selection, hosting, and long-term maintainability, not just implementation to spec.

PROFESSIONAL EXPERIENCE

Full Stack Developer

Sensiple Software Solutions

Mar 2025 – Present

- Informal team lead for a 2–3 person (scaling to 5) development team — task assignment, output review, and delivery ownership across concurrent client projects.
- Primary client-facing technical contact: requirement-gathering meetings, progress communication, translating business needs into development tasks.
- Builds and maintains custom, database-driven websites end-to-end using Core PHP, MySQL, HTML5, CSS3, JavaScript, and React/Next.js front ends.
- Integrates REST APIs and CRM platforms (Power Apps / MS Dynamics 365), including a custom career-form API with full server-side validation.
- Owns the full server and deployment lifecycle — Apache, Nginx, PHP, MySQL, SSL, cPanel/WHM, DNS, Google Cloud Platform — with no separate ops team.
- Designed and deployed a production-grade GoAccess analytics system: real-time dashboards, GeoIP tracking, automated daily/monthly reports with Excel & Word export.
- Drives on-page and off-page SEO and Core Web Vitals improvements using caching, image compression, and code minification.
- Diagnoses and resolves live production incidents (500/502/503 errors, SSL and permission failures, mail deliverability issues) to maintain uptime.
- Building RAG-based AI chatbot capability and exploring a Next.js/Turborepo monorepo migration for the team's SaaS platform.

Full Stack Developer

DS Enterprises

Dec 2023 – Feb 2025

- Designed, built, and shipped 20+ responsive HTML websites and 15+ custom WordPress sites from scratch, end-to-end.
- Built mobile-first, cross-browser-compatible sites using Bootstrap and custom CSS for a range of small-business clients.
- Customized WordPress themes and plugins with Elementor Pro and WPBakery; built dynamic, data-driven pages using JetEngine.
- Owned ongoing maintenance, updates, and performance debugging across a portfolio of live client sites.
- Produced web-optimized visual assets in Photoshop and Illustrator, consistently delivering all projects on schedule.

Full Stack Developer — Intern

DS Enterprises

Aug 2023 – Nov 2023

- Built and maintained websites using HTML, CSS, and WordPress (Elementor), while learning digital marketing fundamentals to support client online presence.

Trainee — Software Testing

Accord Info Matrix Pvt. Ltd.

Oct 2022 – Apr 2023

- Trained in manual and automation testing fundamentals — foundational QA exposure that informs a detail-oriented approach to debugging and cross-browser testing.

Quality Associate

Delphi TVS Technologies Limited

Dec 2020 – Dec 2021

- Applied 7QC tools and TQM methodology via SAP; maintained quality documentation and conducted audits in a high-precision manufacturing environment.

Technical Trainee

Aerotics Technologies

—

- Completed Aerospace Technical Publication training.
